**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments filed 30 April 2008 have been fully considered but they are not persuasive.

***Claim Rejections - 35 USC § 112, second paragraph***

Applicant's amendment has overcome the rejection of claims 1-20 under 35 U.S.C. § 112, second paragraph.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim 21 stands rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wyeth et al(4,940,331).**

Applicant's arguments with respect to the rejection of claim 21 have been considered and are not persuasive, see pages 15-16 of Applicant's remarks.

Applicant argues that the detector 50 and the computer 80 do not meet the limitations of a measuring device having an evaluation device. At column 3, lines 11-21 the detector 50 measures the intensity of light of a pulsed laser beam from fiber 24. At column 3, lines 43-49 the computer 80 evaluates the combined beat signal and amplitude signal to calculate the instantaneous optical difference

frequency. The detector 50 and the computer 80 meet the limitation of a measuring device having an evaluation device.

Further, applicant argues that the computer is not suitable for carrying out the method of claim 1 because it does not contain the required programming. Claim 21 is drawn to an arrangement having a pulsed laser, an electrooptical component and a measuring device having an evaluation device. This structure is met by Wyeth et al. The claim only requires that the arrangement be suitable for carrying out the method of claim 1. To meet this limitation Wyeth et al need only have the claimed structure. No structural limitation or relationship between the claimed structure is found in claim 21 which would differentiate the claim from Wyeth et al. The claim is not limited to carrying out any method or functional limitation programmed specifically into the computer in order to carry out the method of claim 1.

***Allowable Subject Matter***

With regard to claims 1-20, and 22-25; see the Examiner's statement of allowable subject matter in the non-final rejection dated 31 January 2008.

***Action Made Final***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory

period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
